GitHub: <https://github.com/0750kosse>

## Personal profile

A bilingual and motivated software developer, proficient with the MERN stack and now searching for an entry level Front End/ Full Stack Software Developer position where I can continue to learn and strengthen my existing skills. Keen to learn any language and framework necessary to get the job done.

## Skills

---

Javascript, Typescript, ReactJS, Node, Express, MongoDB, RESTful API, Git, Jest, Enzyme, Mocha, Postman

## Experience

---

**St Joseph's Highgate** - (In progress)      **Live Demo:** <https://demo-stjosephs.netlify.app/>

Tasked with revamping the church website for a more modern and accessible feel.

Implemented a new responsive, mobile-first approach to the existing website.

Achieved an 11% increase of compliance score in accessibility.

Refactored codebase and reduced technical debt by 30%.

**Petbuddy** - (In progress) - **Code:** <https://github.com/t0nin0s/petbuddy-website>

Building a responsive, mobile-first interface and migrating existing website to React & Typescript, writing clean, reusable code.

Achieved a 40% and 10% increase in page speed in mobile and desktop respectively.

## Projects

---

**Netfailx** - **Live Demo:** <https://netfailx.netlify.app>

Learnt the React basics by creating a responsive movie search engine application, powered by the Open Movie Database API. Fetches the latest movies, grabs and displays general and detailed movie information, as well as allowing the user to perform a movie search by title. Tech used: React, Javascript, Jest & Enzyme.

**Domino's Pizza** - **Live Demo:** <https://pizzadominos.herokuapp.com>

My first take in creating a full stack application. I developed a RESTful API, where the user can perform CRUD operations. Tech stack with Node, Express, Mongoose, AWS and MongoDB, as well as BCrypt and JWT for authentication. The front-end is implemented with a mobile-first approach and built with Node, uses Express-Sessions to store data, and Handlebars as the view engine.

**NewsReader** - **Live Demo:** <https://clabs-newsreader.netlify.app/>

A news-reader application which allows the user to view and search news from around the world. I built this app with **HTML**, **CSS** and **Vanilla Javascript**. This exercise helped me learning the basics of DOM manipulation as well practical experience fetching and displaying data from the API.

## Professional Experience

---

**Interpreter/Translator - Freelance - January 2017 to present**

Interpreting and translating for both governmental and non-governmental organizations. Clients include the NHS, Ministry of Justice and the Department for Work and Pensions.

**Operations Coordinator - Specialty Group - May 2013- May 2018**

Responsible of repatriating and/or evacuating leisure and corporate travellers, obtaining accurate data in sensitive scenarios whilst offering both medical and travel assistance within policy limits.

**Menswear Manager - Zara UK - 2007 - April 2013**

Consistently met sales and profitability targets by developing business plans, sales, and productivity. Driving the department, involved in recruitment, training, mentoring and coaching junior members of staff.
